The engine is famously durable, much like other Ford engines, which is why it is a prime choice when you want to rebuild your car's motor. Rather than scrap your motor and start over, you can replace the worn components or the entire engine. You can get a remanufactured Ford V10 engine as well, and it will last just as long as a factory original.

The engine itself is a good design with plenty of horsepower and torque, however you have to take into account tire size and gear ratio playing a huge role in the truck being able to put that power to the ground. I had a 99 with a v-10, 3.55 gears, and 285/75-16 tires and with that combination the engine didn't like it at all. Just food for ...
