Fronius CMT 4000 Advanced Manuals

CMT welding is ideal for joining steel and aluminium, as the galvanised steel plate is wetted by this braze-welded joint, while the aluminium melts. Furthermore, the CMT welding process is also suited to the virtually spatter-free brazing of hot-galvanised and electrolytically galvanised sheets with a welding wire made from a copper-silicon alloy.

CMT welding is ideal for joining steel and aluminum, as the galvanized steel plate is wetted by this braze-welded joint, while the aluminium melts. Furthermore, the CMT welding process is also suited to the virtually spatter-free brazing of hot-galvanized and electrolytically galvanized sheets with a welding wire made from a copper-silicon alloy.

CMT - welding processes - welding technology - Fronius

The multiprocess power source is suitable for MIG/MAG, TIG and electrode welding, as well as manual or robotic applications. CMT stands for Cold Metal Transfer. The wire movement is incorporated into the process control, where heat is inserted only very briefly. Metal transfer takes place with barely any flow of current.

FRONIUS TRANSPULS SYNERGIC 4000 MANUAL PDF DOWNLOAD

The CMT process is a highly dynamic welding process with the most stable arc at lowest spattering. Additionally CMT is not only "cold", but rather allows a stepless regulation of the heat input from "cold" to "hot". The result is an even higher welding speed and a broad spectrum of applications where highest welding quality is required.
