A special Indy 289 motor was developed by the Ford engineers. They took a 255 cu. in. small block motor with an all aluminum block and added some real special heads. The heads contained four valves per cylinder, a set of overhead cams and Hilborn fuel injection. Even though quite exotic for the times, it was a successful race engine. EXP 131, 507

Cleveland engine characteristics. The thermostat housing is on the block extension which contains the timing chain; deck height makes a 351c intake not fit on a 400, Spacer plates are available to use a 351C intake on a 351M/400, but it's more practical to use these mainly for large port intakes on 400s using 351C 4V heads.

The engine was discontinued in new trucks (F-Series) after 1996, and new SUVs (Explorer) after 2001, but remains available for purchase from Ford Racing and Performance Parts as a crate engine. The "Windsor" designation is a retroactive applied for the family of engines sharing a common basic engine block design.

**Ford Windsor engine - Wikipedia**

Small Block Cooling System: Many don't think about the cooling system until it's too late. But the cooling system is one of the first areas that needs to be considered because it is an engine's life insurance policy. Ford engines have always struggled with cooling problems due mostly to factory radiators that weren't large enough for ...
