### **Ford V-8 Engine Workshop - wrljet.com**

Ford's low-priced V-8 engine, introduced in 1932, had a difficult start. In addition to problems perfecting the engine's one-piece cast block, the Ford V-8 debuted in one of the worst years of the Great Depression. While the company routinely built more than a million cars a year in the 1920s, it wasn't until 1934 that the one millionth V-8 ...

When the V-8 went into production in 1932, Henry Ford and Ford Motor Company once again revolutionized the automobile market. The engine was the first V-8 light enough and cheap enough to go in an inexpensive car like a Ford. The secret was casting the cylinder block in one piece. This is a common practice today but was a manufacturing breakthrough in 1932.

The Ford 335 engine family was a group of engines built by the Ford Motor Company between 1969 and 1982. The "335" designation reflected Ford management's decision to produce an engine of that size (335 cubic inches) with room for expansion during its development. This engine family began production in late 1969 with a 351 cu in (5.8 L) engine, commonly called the 351C.
