The first decision to make when it comes to chest freezers is how much capacity you'll need. If you're just using it as overflow for your regular upright freezer, a chest freezer with less than 14 cubic feet of space will do. If you plan on storing lots of food for months of eating, on the other hand, look to the larger deep freezers in the 20 cubic feet or more range.

If your ice maker won't work after you reset it, the problem could be a lack of water, an electronic problem or a mechanical malfunction. You can repair some of these problems yourself with the help of your owner's manual, but some require replacement of a part, such as the solenoid or water valve.
