Amr is President of the Asia-Pacific Network of Centers of Earthquake Engineering Research (ANCER), a member of the FIB Seismic Design Commission Working Groups and two Applied Technology Council (ATC, USA) technical committees. He founded the Japan-UK Seismic Risk Forum in 1995 and served as its director until 2004.

Fundamentals of Earthquake Engineering | Wiley Online Books

While other seismic seminars focus on the design aspect of earthquake engineering, the purpose of this seminar is to concentrate on the fundamentals. The course begins with a historical and philosophical review of earthquake engineering and seismic code development, followed by an overview of the latest code approaches to seismic resistant design.

Fundamentals of Earthquake Engineering (71342019)

Fundamentals of Earthquake Engineering combines aspects of engineering seismology, structural and geotechnical earthquake engineering to assemble the vital components required for a deep understanding of response of structures to earthquake ground motion, from the seismic source to the evaluation of actions and deformation required for design.
